

People. Innovation. Excellence.

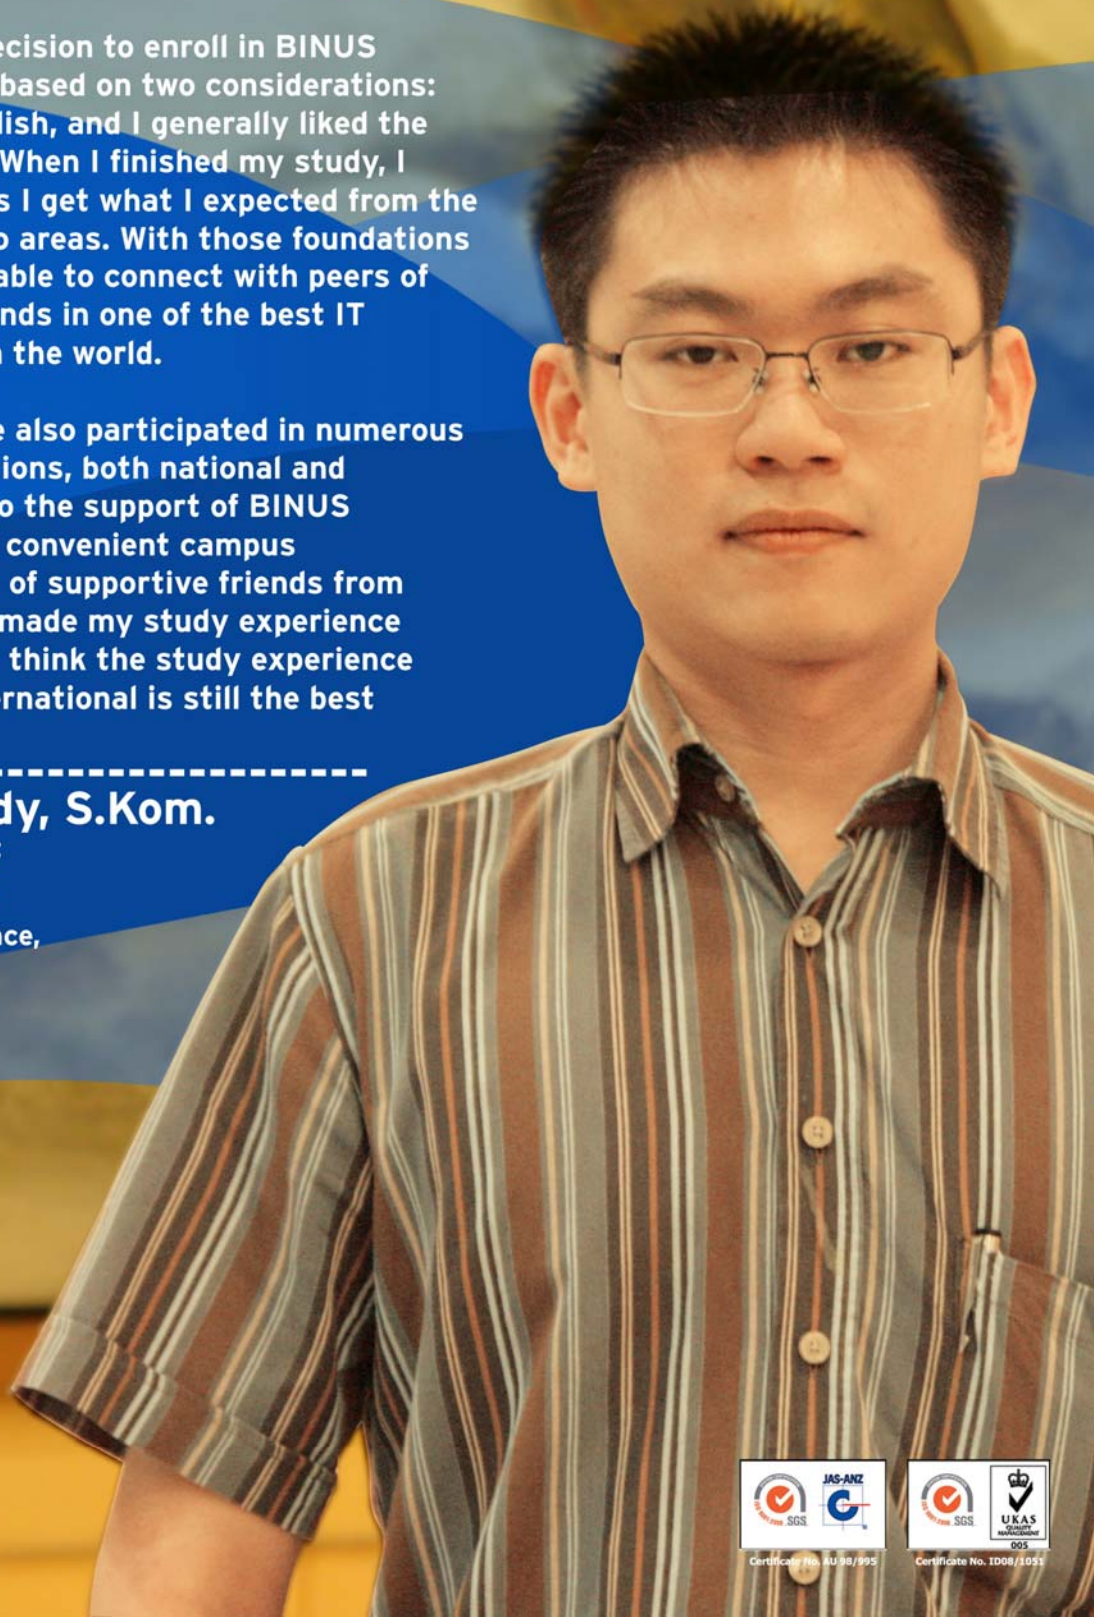

A few years ago, my decision to enroll in BINUS INTERNATIONAL was based on two considerations: the courses are in English, and I generally liked the curriculum presented. When I finished my study, I found that more or less I get what I expected from the University in those two areas. With those foundations set in place, I am now able to connect with peers of international backgrounds in one of the best IT company to work for in the world.

Aside from that, I have also participated in numerous programming competitions, both national and international, thanks to the support of BINUS INTERNATIONAL. The convenient campus environment with a lot of supportive friends from different backgrounds made my study experience richer and enjoyable. I think the study experience provided by BiNus International is still the best I can get in Indonesia.
